

# Doomsday Guide

Personally I don't love Doomsday, but I've been told by people more experienced than I am that Doomsday is a great way to level up captains and gain VP and XP, as well as the rarely attainable immortal essence.

- Who: Individual event, 1 captain at a time
- Player Benefits: Max VP, XP, immortal essence
- Clan Benefits: none
- Titles:
  - Immortal +25% to Hero's Leadership to champion
  - Honored +25% to Hero's leadership for placing #2-100
- Chests: low

Send spears, riders, mercs and monsters. Layer troops, trying to make sure that your spearmen have the highest health points of all the groups you send. You want them hitting first. Riders are your hit squad, so have their health a little lower than spearmen's, then mercs and monsters a little lower again, so they hit last.
